### Base Unit Only

When it becomes questionable whether to upgrade or buy a complete new system, why not just change your base unit and keep your existing monitor, mouse, keyboard, speakers, operating system and software?

Just subtract £68 from Processor Type column to get a Base Unit Only price (ie. Intel E6300 £369 less £68 = £301) and, if required, add from fitted options column. We can supply any specification!
